Avery Dennison®

Architectural Window Films

Avery Dennison Architectural Window Films can improve the performance and transform the appearance of commercial, industrial and residential buildings.

Major glazing system enhancements are available for both interior and exterior use, including solar protection, design and window safety applications.

Solar Window Films

The high performance Solar Window Films filter damaging solar radiation and reduces interior heat build up - providing multiple benefits to occupants such as enhanced comfort and reduced glare, less fading of furniture and lower energy cost.

With a comprehensive range of finishes available, the level of privacy can be selected and the appearance of the building transformed.

Design Window Films

Avery Dennison has developed an attractive range of films to suit projects where enhancing a building's interior and exterior appearance is paramount.

Explore the selection of Design Window Films and discover how a building project can enjoy both aesthetics and excellent solar protection.

Safety Window Films

The Safety Window Film range is designed to improve both safety and security, and offer a range of protection levels to glass breakages caused by accident, malicious intent or extreme weather conditions. Additional surface protection solutions are also available, with Anti-Graffiti properties.

Find a recommended product for a specific glazing systems using our Film to Glass (FTG) application charts available on our website. We provide you with full sales and technical support, to ensure the best possible application results.

Key benefits

UV Block

- > Protects skin
- > Inhibits fading

Light control

- > Improves comfort
- > Reduces glare

Anti-graffiti

- > Protects surface
- > Clean and easy removal

Lower heat gain

- > Improves comfort
- > Saves energy

Aesthetics

- > Upgrades appearance
- > Ensures daytime privacy

Shard retention

- > Enhances personal safety
- > Offers security protection

Reflective Interior

The Avery Dennison® R Silver i Film Series is designed for interior applications in buildings such as offices.

These metalized films provide possibly the maximum amount of energy efficiency by rejecting excess solar radiation, reducing heat build-up from windows. A silver (mirror like) finish is available in two different light transmission levels.

Key benefits

UV Block

- > Protects skin
- > Inhibits fading

Lower heat gain

- > Improves comfort
- > Saves energy

Light control

- > Improves comfort
- > Reduces glare

Aesthetics

- > Upgrades appearance
- > Ensures daytime privacy

	UV Block %		Glare Reduction %		Infrared Energy Rejection (IRER) %		Total Solar Energy Rejected %	
	Single Panel	Double Pane	Single Panel	Double Pane	Single Panel	Double Pane	Single Panel	Double Pane
R Silver 20i	99	99	80	79	79	79	78	70
R Silver 35i	99	99	63	62	68	68	65	58

R Silver 20i Low E	99	99	81	81	82	82	80	71

Reflective Exterior

The Avery Dennison® R Silver X Film Series is designed for exterior installation.

These films are especially energy efficient when used on advanced glazing systems, rejecting the solar energy before it is transmitted through a window. The Poly version is based on a unique adhesive system designed for rigid plastic substrates. Typical applications include commercial buildings. A silver (mirror like) finish is available in two different light transmission levels.

Key benefits

UV Block

- > Protects skin
- > Inhibits fading

Lower heat gain

- > Improves comfort
- > Saves energy

Dual Reflective Interior

Dual Reflective interior films are ideal for commercial and residential retrofit glazing projects where increasing comfort, reducing hot spots and conserving energy are most important, all while maintaining a neutral interior view to the outside.

These films are available with a neutral grey interior finish and a reflective silver exterior finish in seven different light transmission levels.

Key benefits

UV Block

Dual Reflective Exterior

The Avery Dennison® DR Grey X Film Series is designed for exterior installation. A reflective outer layer ensures high solar energy rejection and privacy, while a neutral inner layer based on nanotechnology preserves views to the outside and maintains indoor ambience.

Typical applications include hotels, banks and residential buildings. These films are available with a neutral grey interior finish and a reflective silver exterior finish, in four different light transmission levels.

Spectrally Selective Interior

The Avery Dennison® SP e-Lite i Film Series is designed for interior applications. Nanotechnology is used to filter undesired infrared radiation while allowing visible light to pass through and maintaining colour stability (hence the name 'spectrally selective').

These films are an excellent heat rejection upgrade, preserving the natural appearance of a building's interior and exterior, and are often used for historical buildings. They are available in two different light transmission levels.

Key benefits

UV Block

- > Protects skin
- > Inhibits fading

Lower heat gain

- > Improves comfort
- > Saves energy

Light control

- > Improves comfort
- > Reduces glare

Aesthetics

- > Upgrades appearance
- > Ensures daytime privacy

DS Print SR Interior

DS Print SR is architectural-grade printable film which delivers crisp, high-definition images, and offers limitless interior design flexibility and privacy on interior windows.

DS Print SR i interior window film is engineered for UV wide format inkjet printers. This optically clear PET-based film with scratch resistant coating with ultraviolet block, delivers vivid graphics suitable for large scale branding and decorative interior design. DS Print SR i is available in 2 and 4 mil thicknesses.

Safety & Security Interior

The Avery Dennison® SF Clear i Film Series is designed for interior applications.

A full range of film thicknesses provides various protection levels from glass shattering caused by impact, blast, crime and natural disaster. These transparent films offer excellent clarity, low reflectance and high UV protection, and are available in six different thicknesses.

Key benefits

UV Block

- > Protects skin
- > Inhibits fading

Shard retention

- > Enhances personal safety
- > Offers security protection

	UV Block %	Glare Reduction %	Total Solar Energy Rejected %
SF Clear 4 mil i	97	1	16
SF Clear 7 mil i	99	2	17
SF Clear 8 mil i	99	2	18

SF Matte 12 mil i	99	38	40

Safety & Security Exterior

The Avery Dennison® SF Clear X Film Series is designed for exterior applications. It uses a durable, scratch resistant hard coating and an advanced adhesive system.

These exterior safety films provide an additional level of protection from the external side of the window, ensuring that glass shards do not injure passing pedestrians. The transparent films offer excellent clarity, low reflectance and high UV protection, and are available in two different thicknesses.

Key benefits

UV Block

- > Protects skin
- > Inhibits fading

Shard retention

- > Enhances personal safety
- > Offers security protection

Solar Safety Interior

Avery Dennison's Solar Safety interior films combine the shard protection of safety security films with excellent levels of energy efficiency for immediate energy savings, comfort and attractive appearance that achieves far more than passive glazing protection. Building codes and insurance policies often demand glazing that meets certain safety standards such as impact-resistant glass in schools to break-in or blast protection for retail locations.

Avery Dennison's Solar Safety interior films deliver exceptional solar and security solutions for the needs of industry, businesses and institutions, and are available in two different light transmission levels and film thicknesses.

Surface Protection PolyFilms Exterior

The Avery Dennison® PolyFilm X Series is designed for exterior applications. A unique adhesive allows application to plastic substrates such as polycarbonate or acrylic.

The special surface coating provides resistance to scratching, protects surface from acid and enables easy cleaning of most sprays, paints and pens. This film also protects plastic substrates against yellowing due to sun exposure and extends plastic lifespan. The transparent material is available in two different thicknesses.

Key benefits
