

Avery Dennison Frosted Sparkle SLP

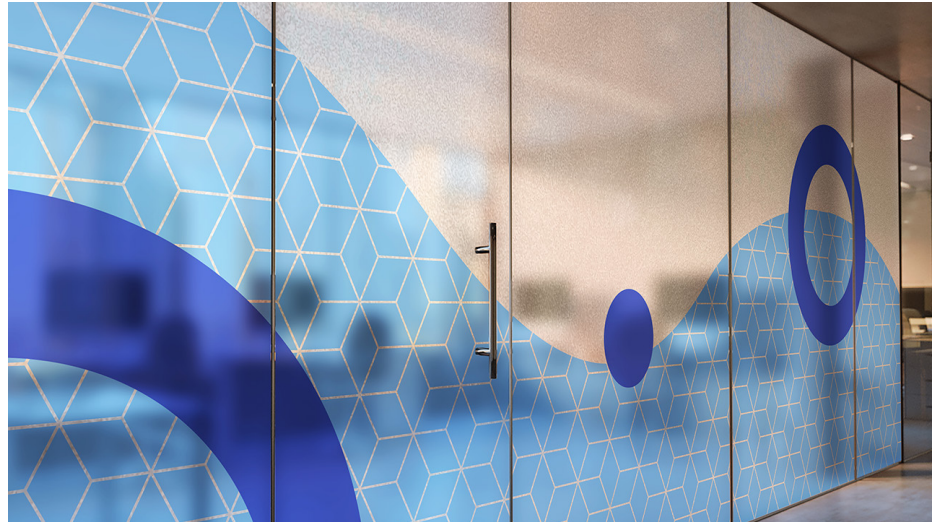

Combine Privacy with Style

Innovative and premium PVC based films for extraordinary glass decoration applications. Ideal for windows and glass walls, these films are meant for both indoor and outdoor applications and adds a layer of privacy while still allowing natural light to illuminate the interiors.

The excellent printability of these films on eco solvent, solvent and latex printers offers endless design possibilities. While creating impactful glass decorations for homes, offices, and other facilities, its printability feature also allows you to customize as per your individual architectural and interior styles.

Small sparkles on the films surface reflect light, making it suitable for decoration purposes

Key Features and Benefits

- An attractive film with sparkle and sandblasted glass effect bringing your interior design ideas to life.
- Vibrant colors across major printing platforms of eco solvent, solvent and latex.
- Change easily with quick and simple installation and conversion thanks to excellent dimensional stability and removable adhesive.
- Translucent film which allows natural light to pass.
- 1 year outdoor and 2 year indoor durability, making it ideal for changing with the design trends.

Recommended Uses

- **Office buildings**
Create privacy without compromising on the sunlight, highlight your brand visuals in your office's interiors.
- **Retail**
Use glass to display striking promotional and brand graphics, section off areas without making the space feel too congested.
- **Hotel and residential spaces**
Frosted Sparkle SLP offers stylish decoration options for the windows while allowing you to display customized images or plotter cut designs.
