Avery Dennison PPF Enduro Plus Series

Advanced Paint Protection, built to last

The PPF Enduro Plus Series represents Avery Dennison's latest advancement in paint protection film, precision-engineered to deliver reliable, long-lasting defence for your vehicle's paintwork. Designed with both performance and ease of installation in mind, the Enduro Plus Series gives installers and car owners the confidence that their vehicle is protected by a film built to last, backed by a 6-year company warranty.

PPF Enduro Plus Gloss

Engineered for those who demand both protection and a pristine finish, the PPF Enduro Plus Gloss delivers excellent hydrophobicity, good stain resistance, and the self-healing technology that allows minor surface scratches to fade when exposed to ambient heat. Its medium tack adhesive is optimised for smooth, efficient installation, reducing application time and minimising errors, making it a reliable choice for professional installers.

PPF Enduro Plus Matte

Beyond protection, this film allows car owners to change the appearance of their vehicle's paintwork, creating striking satin, magno, or frozen finishes that stand out from the crowd. With the same high-performance credentials as the Enduro Plus Gloss, it is an ideal choice for those who want style and substance in equal measure.

Key Features

Superior Hydrophobicity
The Enduro Plus Series delivers excellent water-repellent performance, causing water and contaminants to bead and roll off the surface effortlessly, keeping the film cleaner for longer.

Impact Resistance
A robust film construction provides good impact resistance, shielding your vehicle's paintwork from stone chips, debris, and the general wear and tear of daily driving.

Stain Resistance
Formulated with good stain resistance, the Enduro Plus Series protects against marks and discolouration caused by environmental fallout, insect strikes, bird droppings, and everyday road grime.

6-Year Company-Backed Warranty
Every PPF Enduro Plus film comes with a 6-year warranty — a clear demonstration of Avery Dennison's confidence in the product's durability and long-term performance.

Self-Healing Technology
Minor scratches and surface imperfections fade with ambient heat, ensuring the film maintains its appearance over time without the need for costly repairs or replacements.
