The latest version of the REACH SVHC Candidate list can be found on the ECHA-website [here](#).

REACH – Candidate List of Substances of Very High Concern

Date. 28 November 2024

On November 07, 2024, the European Chemicals Agency (ECHA) updated the Candidate List of Substances of Very High Concern (SVHC). Under the REACH Regulation No 1907/2006 Article 33, Avery Dennison Materials Group Europe are required to inform our customers about any products exceeding the 0.1% w/w threshold for SVHC content.

Avery Dennison Materials Group Europe, as a downstream user of chemical substances, actively works with our suppliers to ensure adherence to REACH regulations. This effort includes the continuous monitoring of substance registration from suppliers, and products containing SVHC.

Per ECHA's Guidelines on substances in articles, specified in Appendix 3/ Table 6, our self-adhesive products are recognized as articles containing an integrated substance or mixture, and considered as articles under the REACH definition. Specifically, a self-adhesive laminate is categorized into two distinct articles:

- Face material and adhesive (one article)
- Liner and silicone coating (one article)

Below, you will find an updated inventory of products containing SVHC that Avery Dennison Materials Group Europe has been offering since November 2024.

We greatly value our business with you and remain fully committed to providing excellent customer service and delivering high quality product solutions. If you have questions or need assistance, please reach out to your Avery Dennison representative.

Sincerely,

Product Stewardship Department
Avery Dennison Materials Group Europe
