

# Supreme Wrapping Film™ for Marine Applications

Our versatile and highly popular Supreme Wrapping Film™ range is also available for above-the-waterline wrapping applications in marine environments.

We have developed a high-performance Edge Sealer that seals the edges of the installed film and prevents lifting due to water and chemical penetration. The long-lasting liquid sealant allows

installers to benefit from best-in-class Supreme Wrapping Film™ performance across many marine projects.

A broad range of film colours is available, opening up a wide range of new aesthetic opportunities for boat owners who want to revamp and renew their boat using products that look good over time.

## Key features

Edge-sealed wraps resist water and chemical penetration

Edge Sealer fluid applies easily and dries fast, without dilution

Finished wraps are durable and UV stable

Edge Sealer is transparent, with a glossy finish

## Benefits

New design possibilities for boat decoration

Long-lasting and best-in-class product performance for marine applications\*

Long-term film removability, preserving boat paint, and boat value

Faster than boat painting (less drying time and no masking)

\* Above the waterline

MAKING POSSIBLE™

# Supreme Protection Films

For Marine Applications

Our best-in-class protection films are designed to protect your vessel's hull surface from regular wear and tear, scratches and weathering avoiding damages on the paint, wrap or the gelcoat of the hull, retaining the boat's value

Supreme Protection Films SPF-X3 and SPF-Gloss Black are validated for application above the waterline in the marine environment in combination with the Avery Dennison Edge Sealer.

These best-in-class protection films are designed to protect your vessel’s hull surface from regular wear and tear, scratches, and weathering, avoiding damages on the paint, wrap, or gelcoat of the hull, retaining the boat’s value.

Our engineered top coat has been specially designed to enhance its stain resistance and reduce potential discoloration and yellowing. SPF series provide a wide range of products to suit best your needs: Our high gloss transparent SPF-X3 film is almost invisible to the naked eye, maintaining the vessel’s appearance, while our SPF-Gloss Black will allow new aesthetic opportunities.

## Key features

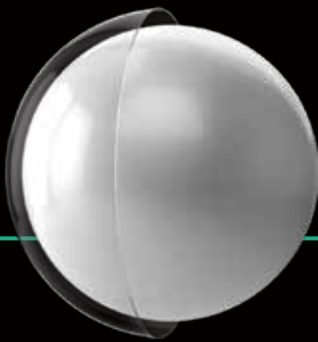

Supreme Protection Films SPF-X3 and SPF-Gloss Black are now validated for above-the-waterline application on the vessel’s hull

SPF-X3 and SPF-Gloss Black are durable and UV stable, offering up to seven years of durability

The films are designed for easy and fast installation

SPF-X3 and SPF-Gloss Black can be applied on top of Supreme Wrapping Films™ films for Marine Applications

For more information, read page 4

**SPF-X3**

**SPF-Gloss Black**

## Benefits of film applied above the waterline

Premium Protection of the boat’s hull against wear and tear from sand, salt, and a humid marine environment

Improved resistance against weathering and stains

Heat-assisted self-healing film for long-lasting appearance

Helps to improve the life and resale value of your boat by protecting the hull surface

New aesthetic opportunities for the look of your boat

## Recommended Uses

SPF-X3 and SPF-Gloss Black can be used for high-exposure areas such as the fender rub, buoys areas, bathing platforms, and wear areas of the hull in combination with the Avery Dennison sealer that protects the film edge.
