

SQUID[®]

Dear customer,

Thank you for choosing Squid!

Squid is a self-adhesive fabric that lasts for years with proper maintenance. Although it looks like foil, it is actually a woven fabric. Maintenance of Squid is therefore very different from regular window foil. So, please inform your cleaning team of the following aspects.

1. Immediately after installation

Squid uses a semi-permanent adhesive, which adheres more strongly with the passage of time. Therefore, avoid pulling the fabric loose from the window, especially just after installation.

2. Cleaning the fabric

Thanks to Squid, your windows will no longer get dirty or need washing. There is no need to remove Squid itself. You can dust Squid using a vacuum cleaner with a soft brush. To remove simple stains, use a damp microfiber cloth and some warm water. For more 'stubborn' stains, such as chocolate, pencil, honey, mayonnaise... you can try a spot cleaner for textiles. Use a textile cleaner without solvents, such as TMC 520 or James Wonder, and follow the instructions carefully.

3. Cleaning the window

You no longer need to wash fully covered windows. For partially covered windows, it is best to avoid dirty water running into Squid. Therefore, avoid cleaning the uncovered part of the window with a sponge. A better alternative is to spray glass cleaning product onto a microfiber cloth and clean the uncovered part of the window with that. If Squid becomes moist, allow the liquid to evaporate slowly without touching the fabric.

4. Removing Squid

At the end of Squid's lifespan, the fabric can be easily removed in one piece. Loosen one corner and pull the fabric off the window. Depending on how long your Squid has been in place, there may be some adhesive residue. Because the adhesive is water-based, you can easily remove any residue with soap and water. For larger adhesive residues, simply use a glass scraper to speed up the cleaning process.

5. More info or questions?

Customer satisfaction is a top priority for us. Don't hesitate to contact your installation company if you have questions or to give feedback.

Have fun with Squid!

The Squid Team
