

Protection you can trust.

Science driven innovation has developed highly advanced and durable exterior protection film for your vehicle. Built with three specialty engineered layers, Avery Dennison® paint protection film is developed to preserve OEM paint finishes against daily environmental and road conditions. To the naked eye these films are almost invisible, maintaining the authentic car styling. Avery Dennison paint protection films are made with enhanced polyurethane for high scratch resistance, self-healing at room temperature, and supreme visual finishes.

Paint protection films deliver a wide range of protection for vehicles.

LEADING AUTOMOTIVE AFTERMARKET FILMS

Avery Dennison is a leading manufacturer of automotive wrapping and accent films. Our Supreme Wrapping™ Film is recognized for quality and ease of application, and features over 120 colors, finishes and visual effects. We provide performance and custom-ready style when you need it most.

KEEP LOOKING FACTORY NEW

A car in perfect condition has faultless paintwork. Driving exposes the bodywork to the elements and road debris, with your paint taking the punishment. Advanced paint protection films create a barrier against stones, stains, and the damage caused by environmental elements at high speed. And when an inevitable chip hits your vehicle, trust our self-healing technology will stand up to the impact.
