

Avery Dennison® NR Series Automotive Window Films

Superb Solar Protection and Stylish Look

Avery Dennison® NR Series automotive window films are specially designed for keeping car interiors safer from the harmful sun.

The combination of advanced UV stable embedded dye film with additional UV absorbing pressure sensitive adhesive, provides excellent UV block protection of the vehicle interior and passengers.

Features and Benefits

- Easy to install with excellent dot matrix fitting and optimal conformability.
- Great heat rejection and up to 94% glare reduction, with minimal reflective effect.
- Blocks 99% of harmful UV.
- Designed for easy and professional installation.
- Stylish car upgrade without any signal interference (metal free).

Series	NR Non-Reflective
Technology	UV Stable Dye Metal-Free
Color Tone	Warm Graphite
Construction	2-Ply Weatherable
Thickness	1.5 Mil
Warranty	Lifetime, Limited Non-Transferable ¹
Color Stable	Yes

¹ For information on warranty terms, exclusions and certain limitations that apply please see the applicable product data sheets and other literature and bulletins on our website: graphics.averydennison.com

Optical & Solar Properties²

²Performance results are calculated on 1/4" (6mm) clear glass using NFRC methodology and LBNL Window 5.2 software, and are subject to variations in process conditions within industry standards.

³SIRR - Selective InfraRed Rejection: the percentage of IR radiation that is not directly transmitted through a glazing system. Calculated as %SIRR = 100% - % Transmission (@ 780-2500nm).

⁴IRER - InfraRed Energy Rejection: the percentage of Near Infrared Energy Rejection as measured between 780-2500nm. Calculated as the TSER over 780-2500nm: %IRER = 100% - 100*SHGC (@ 780-2500nm).

⁵Colors and tinting level are an approximate match. For a true color reference, please refer to the actual film sample.
