

HV1200 Reflective Films. Always Be Seen.

Why should you try HV1200 for your reflective needs?

- > Stable and consistent product that has seen considerable updates since 2009
- > Increase adhesive coat weight for superior adhesion to your substrate
- > Greater lamination pressure (5x more) for stronger product layers that acts as a tight protective coating for the metal
- > Consistent more flexible materials for improved outdoor performance

Versatile Films For Reflective Applications

HV1200 is specifically designed for screen printing and for use on computer sign cutting equipment, Avery Dennison® HV 1200 Reflective films provide excellent cutting, weeding, transferring and conforming characteristics.

HV1200 meets or exceeds ASTM® D4956 for reflectivity with premium quality, enclosed lens, retro-reflective film.

Product features also include:

- > 7 year durability
- > Long-term durability and outdoor performance
- > Dimensionally stable liner for easy converting, even on CAD plotters
- > High-gloss finish
- > Screen printable
- > Good dimensional stability
- > Good UV, temperature, humidity and salt-spray resistance
- > Meets ASTM® D4956, Type I
