PR 800 Translucent Series

High Performance, Flexible, Translucent Cast Vinyl Films

PR 800 Translucent Films have high performance at a great value for intermediate durability in pigmented translucent films. These flexible, translucent cast vinyl films are especially suited for screen printing, cut graphics and thermo-forming. Ideal for architectural or directional signage and outdoor advertising, they have intermediate durability in pigmented translucent films. Avery Dennison® PR 800 Translucent Films are flexible, translucent cast vinyl films for back-lit graphic applications.

Indoor and outdoor illuminated signs that prove a premium look day and night for a variety of applications.

KEY BENEFITS:

- > Up to 6 year durability for lasting outdoor performance
- > Consistent color under both transmitted and reflected lighting conditions
- > Matte finish provides a non-glare, uniform finish
- > Easy cutting and weeding
- > Excellent UV, temperature, humidity and salt-spray resistance

APPLICATIONS:

- > Architectural signage
- > Directional signage
- > Outdoor advertising
- > Window applications
- > Excellent for thermo-forming, back-lit applications

For wet applications, we recommend Avery Dennison UC900.
