

MPI Perforated Window Series with DOL

Window Film For Use With All Printing* Platforms, Including Latex.

The latest additions to the MPI Perforated Window Series bring more options than ever before. Our **MPI 3729** and **MPI 3529** films print across all printer platforms, including latex. They also provide a more economical option for flat applications, simple curves or vehicle windows.

MPI 3729's 60/40 perforation pattern provides an open area of 40%, allowing the best possible image quality while maintaining one-way visibility on stationary windows.

MPI 3529's 50/50 perforation pattern allows more visibility for vehicle applications. Both come with two-year unprinted/one-year printed durability. Both are latex compatible.

Both MPI 3729 and MPI 3529 can be paired with another addition to the family – **DOL 6560**. The combination provides good scratch-resistance, increased vibrancy and durability to your graphic and potentially reducing overall advertising costs. At 1 mil, DOL 6560 is the **thinnest** that Avery Dennison has to offer, and is designed for use with shorter-term applications.

*Specific to the following printing methods: solvent, eco-solvent, mild solvent, UV & latex.

APPLICATIONS

- Signage
- Vehicle windows
- Trade shows
- POP

MPI PERFORATED WINDOW SERIES WITH DOL

More Options for Added Versatility

The foundation of Avery Dennison's Perforated Window Series is its **MPI 2728** and **MPI 2528** films. These options can be printed on all platforms with the exception of latex, offer opaque/blockout capabilities and durability of three years unprinted/one year printed.

MPI 2728's 65/35 perforation pattern provides an open area of 35%. Ideal for stationary windows, it allows for the best possible image quality while still providing a one-way graphic panel.

MPI 2528 has 50/50 perforation pattern that provides an open area of 50% and the best possible visibility through a one-way graphic panel. This film is intended for vehicle windows or applications where visibility through the graphic is important.

DOL 1560 is a premium quality, flexible high-gloss overlamine vinyl film for applications demanding 100% optical clarity.

Product	Pattern	Latex Compatible	DOL	Printed Durability	Application
MPI 2528	50/50	No	1560	1	Slight Curve
MPI 2728	65/35	No	1560	1	Slight Curve
MPI 3529	50/50	Yes	1560	1	Slight Curve
			6560	1	Flat
MPI 3729	60/40	Yes	1560	1	Slight Curve
			6560	1	Flat

Features	Advantages	Benefits
Prints across all printer platforms	Excellent print performance with UV, solvent, eco-solvent and latex*	Increases application versatility
Available in a variety of perforation patterns	Offers 50%, 40% or 35% open area options	Allows for best possible image quality, depending on application
Pairs with DOL	Enhances clarity and scratch resistance	Extends life of graphic and lessens advertising costs
1.5 mil hole	Excellent light transmission	Great image clarity and color pop

*Latex printing not available with MPI 2528 and MPI 2728.
