MPI 2900 Series Transforms Ingraham High School Athletic Facility

Choose an Intermediate Calendered Film when the application requires a flat surface and a medium level of durability against the elements.

Ingraham High School's gymnasium, with floors and bleachers that date back to the year the school opened, was selected as one of four schools to receive an athletic facility renovation this year. The transformation was aired in the second episode of the ESPN original series RISE UP. Ingraham alumni Greg Root, president of SuperGraphics, selected the MPI 2900 Series of Intermediate Calendered films, for the project.

"With Avery Dennison's assistance and the MPI 2900 Series, the new athletic facility is a source of pride for Ingraham's students and community for many years to come."

Greg Root, president of SuperGraphics
